EXECUTIVE SUMMARY

Driven Software Developer with experience in building scalable, user-centric applications across frontend, backend, and mobile platforms. Leverages intelligent technologies to optimize backend processes and deliver seamless user experiences. Committed to continuous learning, effective problem-solving, and meaningful contributions to modern development teams.

WORK EXPERIENCE

Iconix Software Solution | AI Intern

- Integrated OpenAI-powered chatbots into web applications to automate customer support, allowing users to get instant answers to their queries.
- Developed a complete Brain Tumor Detection system, managing the entire process from collecting medical image data to deploying the final product for accurate diagnosis.

Freelance | Developer | Video Editor

- Built and launched full-featured web and mobile apps, handling everything from user interface design to backend database management.
- Collaborated with clients to create social media video content and used competitor analysis to optimize editing, exceeding expectations and boosting engagement.

PROJECTS

Smart Inbox Assistant | LLM Application Developer

- Developed an automated email agent using GPT-4 and LangChain to classify and draft responses. Implemented a secure "human-in-the-loop" approval system, reducing daily processing time by 40%.

AGRON AI | AI & IoT Engineer

- Engineered an autonomous rover using YOLOv8, Raspberry Pi, and Arduino for object detection. Integrated environmental sensors to achieve 95% accuracy in real-time crop monitoring, designed to automate manual fieldwork.

Key Technical Initiatives

- Real Estate App (EstateHub): Developing a cross-platform app using Flutter and Supabase. Optimized filtering algorithms to improve query response speed by 20%.
- Stock Market Pipeline: Built an automated forecasting tool using statistical time-series analysis. Integrated with Power BI to deliver real-time market visualization dashboards.
- Study Focus Tracker: Developed a behavioral analysis system using OpenCV and Computer Vision. Optimized detection to track user attention with sub-100ms latency.

TECHNICAL SKILLS

- Core Frontend Technologies : HTML5, CSS3, JavaScript, React JS
- Backend Technologies : Node JS, Express JS
- Database Technologies : MongoDB, Supabase, SQL
- AI & Machine Learning : Machine Learning Techniques, Regression & Classification Models, LLMs
- AI Tools & Frameworks : GPT-4, LangChain, OpenCV, YOLOv8
- Creative & Multimedia Tools : Adobe Premiere Pro, After Effects, CapCut
- Analytics & Visualization : Power BI
- Additional Knowledge : Flutter, API Integration, Git, Basic Digital Marketing

SOFT SKILLS

- Team Collaboration : Developed through freelance and academic group projects.
- Effective Communication : Strengthened by working closely with clients and project teams.
- Attention to Detail : Enhanced through video editing work, ensuring high-quality and precise outputs.
- Continuous Learning & Adaptability : Demonstrated by consistently upskilling and learning new technologies.

EDUCATION

BTech ARTIFICIAL INTELLIGENCE AND DATA SCIENCE
Francis Xavier Engineering College (2022-2026)
GPA - 8.6

CERTIFICATES

BUSINESS INTELLIGENCE USING POWERBI	(2023)
By Skill Nation	
NPTEL :The Joy Of Computing Using Python	(2024)
NPTEL :Introduction To Industrial 4.0 And Industrial Internet Of Things	(2024)
